National Community Survey

## About the Survey

This Survey Report presents findings of a CivicPanel online survey about how citizens evaluate local government services and how they obtain government performance information. The survey was conducted at the same time as a nationwide mail survey, using an identical questionnaire and probability sampling methods, thus allowing a comparison of this more established method to the results obtained from a CivicPanel online survey. This report presents results only from the online survey.

The survey was conducted in January 2012, and included online responses from 784 panelists.

## About the Panel

CivicPanel is an online panel of volunteers who sign up over the Internet to participate in the project's surveys. Panelists are recruited from online ads, web directories, and announcements sent by email to members of various nonprofit organizations that have partnered with CivicPanel (formerly eTownPanel) over the years.

It is important to point out that the panel is not a random sample, and thus the results are not scientifically projectable to the larger population.
